WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

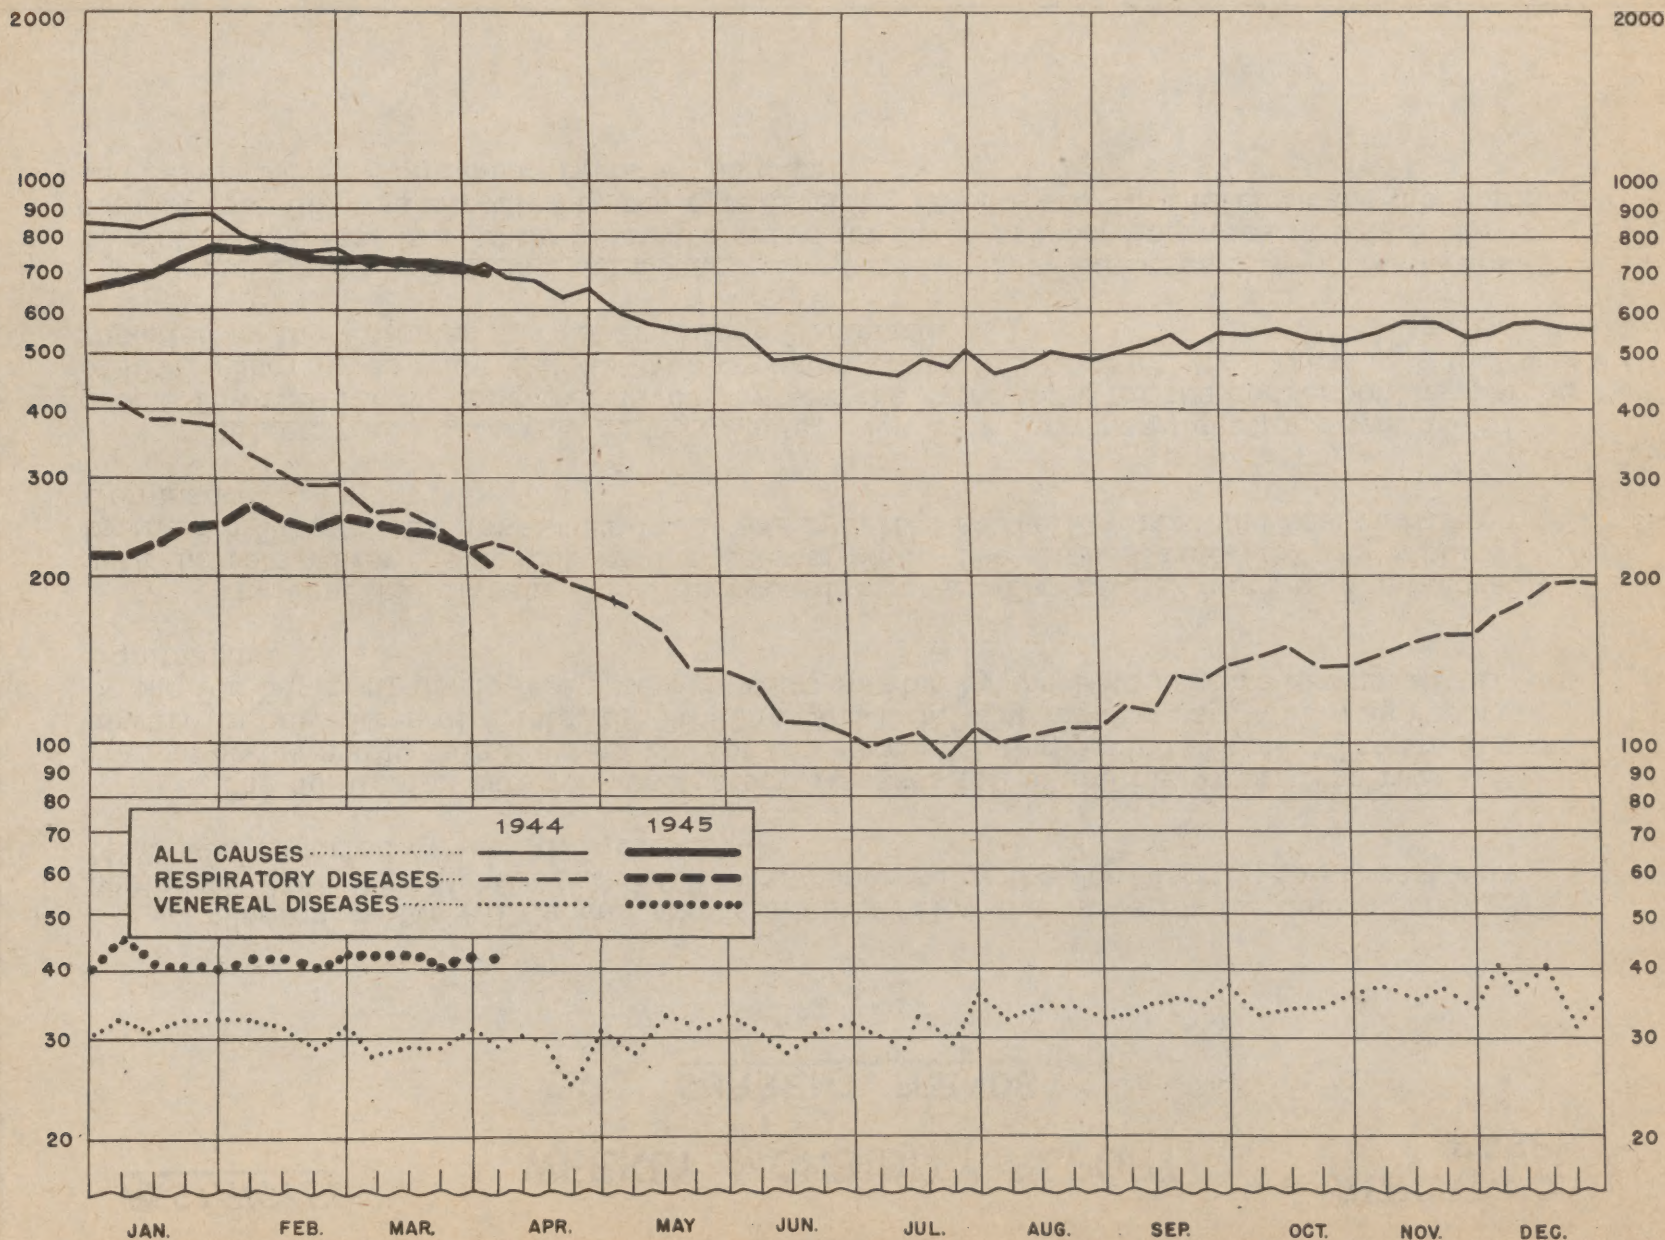

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

CURRENT TRENDS

Week Ending 7 Apr 1945

The curve for All Causes stands slightly below the curve for the corresponding period of 1944. The highest rate (1025) was reported by the 9th District; the lowest rate (437) was reported by the 7th District.

The admission rate for respiratory diseases fell again this week. The rate 207 compares favorably with the rate 230 for the corresponding period of 1944. The trend was upward in only three districts, the 7th, 11th, and 12th. The highest rate (351) was reported by the 9th District; the lowest rate (95) was reported by the Potomac and Severn River Commands.

The venereal disease curve dropped this week. The rate 42 compares unfavorably with the rate 28 for the corresponding week of 1944. The highest rate (73) was reported by the 8th District; the lowest rate (20) was reported by the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. The rate for these infections continues to drop. The rate 128.30 compares favorably with the rate 155.80 for the corresponding period of 1944. The highest rate (247.33) was reported by the 3rd District; the lowest rate (50) was reported by the Potomac and Severn River Commands.

Pneumonia--Broncho and Lobar. The rate for these diseases is reported again at 4. This curve stands slightly below the curve for the corresponding week of 1944. The highest rate (13) was reported by the 5th District. The 6th and 7th Districts and the Potomac and Severn River Commands reported no cases.

CURRENT TRENDS CONTD.

Pneumonia, Atypical. The rate for this disease continues again at 2. This rate compares favorably with the rate 2.6 for 1943 and the rate 3.0 for 1944. The highest rate (5) was reported by the 5th District. The 1st, 4th, and 6th Districts reported no cases.

Tonsillitis and Pharyngitis, Acute. Though the trend continues downward, the curve stands above the curve for the corresponding period of 1944. The 9th District reported the highest rate (181); the lowest rate (32) was reported by the 7th District.

Rheumatic Fever. After a slight rise last week, the rate dropped back to 2. This rate compares favorably with the rate 4 for the corresponding week of 1944. The highest rate (7) was reported by the 9th District. The 4th and 7th Districts reported no cases.

Scarlet Fever. The admission rate for this disease dropped again this week. The rate 21 compares unfavorably with the rate 9 for the corresponding week of 1944. The highest rate (80) was reported by the 9th District. The 7th District reported no cases.

Cerebrospinal Fever, Meningococcic. Only two districts, the 5th and 12th reported cases. The rate 0.07 compares favorably with the rate 0.45 for the corresponding week of 1944.

Malaria. The rate for this disease is reported again at 2. The curve stands below the curve for the corresponding period of 1944. The highest rate (8) was reported by the 4th District; the lowest rate (0.33) was reported by the 9th District.

Measles. The rate for this disease fell again this week. The rate 7 compares favorably with the rate 12 for the corresponding period of 1944. The highest rate (20) was reported by the 9th District. The 4th District reported no cases.
